## 1. Identification of the substance/mixture and of the company/undertaking

### 1.1 Product identifier

**Product name:** BITUCRACK  
**Product description:** Elastomeric bituminous mastic  
**REACH registration number:** Mixture (registration is not required according to REACH regulation, 1907/2006/EC)

### 1.2 Relevant identified uses of the substance or mixture and uses advised against

**Intended uses:** Sealing cracks in pavements. It must be used only for professional use.

### 1.3 Details of the supplier of the safety data sheet

BITUMIX S.A.  
PRODUCTION OF BITUMINOUS MIXTURES  
K. KARAMANLI 124, IONIA THESSALONIKIS  
P.O.Box: 1715, 57008 IONIA THESSALONIKIS  
TEL: (0030)2310 710017  
FAX: (0030)2310 710016  
e-mail: info@bitumix.gr

### 1.4 Emergency telephone number

National Chemical Emergency Centre (24h): +44 (0) 1235 239 670

## 2. Hazards identification

### 2.1 Classification of the substance or mixture

The product is not classified as hazardous according to Regulation 1272/2008 / EC (CLP) and subsequent amendments.

### 2.2 Label elements

Hazard labeling according to EC Regulation 1272/2008 (CLP) and subsequent amendments and supplements.  
**Hazard pictograms:** Not applicable  
**Signal words:** Not applicable  
**Hazard statements:** Not applicable  
**Precautionary statements:**  
- P273: Avoid release to the environment.  
- P280: Wear protective gloves / protective clothing / eye protection / face protection.  
- P302+P352: IF ON SKIN: Wash with plenty of soap and water.

### 2.3 Other hazards

Information not available

## 3. Composition/information on ingredients

### 3.1 Substances

The product is mixture
3.2 Mixtures
It contains the following hazardous substances:

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>Percent %</th>
<th>REACH registration number</th>
<th>CAS number</th>
<th>EC number</th>
<th>Classification 1272/2008 (CLP)</th>

</tbody>
</table>

4. First aid measures

4.1 General information
After inhalation: Remove patient to fresh air and seek medical attention. In case of unconsciousness, place patient stably in side position for transportation.
After skin contact: Remove contaminated clothing. Wash skin with soap and water.
After eye contact: Wash immediately eyes with plenty of water for a long time keeping the eyelids open and seek medical attention.
After swallowing: Rinse mouth immediately and then drink plenty of water. Consult doctor immediately.

4.2 Most important symptoms and effects, both acute and delayed
No further relevant information available.

4.3 Indication of any immediate medical attention and special treatment needed
No further relevant information available.

5. Firefighting measures

5.1 Extinguishing media
Suitable: CO₂, dry chemical powder, sand, foam
Unsuitable for safety reasons: Water with full jet, water spray

5.2 Special hazards arising from the substance or mixture
The product is not flammable in the form in which it available. In case of incomplete burning may be formed CO, H₂S, SOₓ and other harmful compounds.

5.3 Advice for fire-fighters
Special protective equipment:
Fireproof suit with helmet (EN 469, 533, 1486) and self breathing apparatus (EN 137)

Additional information:
Remove the product packaging and other flammable materials away from the fire and if it is required, cool the packaging’s outside with water. Contaminated water and residues from the fire are collected separately and disposed of in accordance with local regulation. It must not enter the sewage system.

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures
Avoid contact with spilled material. Remove all the contaminated clothes. Use the appropriate means of body protection (see section 8).
6.2 Environmental precautions
Avoid water and ground contamination. Do not allow to enter sewers and water surfaces.

6.3 Methods and material for containment and cleaning up
Limit the spread of the material forming protective barriers with sand or sawdust. Collect as much product as you can in a clean container for reuse (by preference) or dispose of as hazardous waste. Cover the rest product with some inert material or powder for disposal. In case of water contamination inform immediately the local authorities for the restriction of the damage. Dispose contaminated materials as hazardous waste according to item 13.

6.4 Reference to other sections
See Section 7 for information on safe handling. See Section 8 for information on personal protection equipment. See Section 13 for disposal information.

7. Handling and storage

7.1 Precautions for safe handling
Avoid contact with eyes and skin. Do not eat or drink while handling the material. Use appropriate means of body protection (gloves, gowns, shoes). Apply all rules of personal hygiene after each use. Avoid contact with strong acids. Avoid leakage of the product into the environment.

7.2 Conditions for safe storage, including any incompatibilities
Store in covered and sheltered from frost places and at temperatures of not less than 5°C. Application temperature between 5°C and 40°C. At low temperatures may cause coagulation of the emulsion, while at high temperatures the product rapidly breaks making it difficult or impossible to implement.

7.3 Specific end use(s)
No further relevant information available.

8. Exposure controls/personal protection

8.1 Control parameters

<table>
<thead>
<tr>
<th>Ingredient name</th>
<th>ACGIH-TLV(3/2012) TWA</th>
<th>NIOSH REL (1/2013) TWA</th>
<th>NIOSH REL (1/2013) STEL</th>

</tr>
<tr>
<td>Bitumen fumes (&gt;120°C)</td>
<td>0,5mg/m3</td>
<td>5mg/m3</td>
<td></td>
</tr>
</tbody>
</table>

8.2 Exposure controls
Personal protective equipment:
General protective and hygienic measures:
Avoid contact with skin and eyes. Keep away from foodstuffs, beverages and feed. Wash hands and face before breaks and at the end of work.

Protection of hands:
Wear suitable gloves (EN 374). The glove material has to be impermeable and resistant to the product. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation (nitrile rubber, chloroprene rubber, PVC). The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. For this reason the suitability of gloves should be checked before use.

Eye protection:
Wear safety glasses (EN 166).

Body protection:
Wear category II professional long-sleeved overalls and safety footwear (EN 340, 365, 466, 467). In case of release wear PVC apron (EN 345).
9. Physical and chemical properties

</tbody>
</table>

9.2 Other information

Content of V.O.C: 0gr/Lt

10. Stability and reactivity

10.1 Reactivity
There are no particular risks of reaction with other substances in normal conditions of storage and use.

10.2 Chemical stability
The product is stable in normal conditions of use and storage. It does not decompose when it is stored and is handled properly and is not polymerised.

10.3 Possibility of hazardous reactions
Under normal conditions of storage and use, hazardous reactions will not occur.

10.4 Conditions to avoid
Avoid contact with strong acids.

10.5 Incompatible materials
Oxidising substances, acids.

10.6 Hazardous decomposition products
In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.
11. Toxicological information

Corrosion/Irritation: Not available.

Sensitization respiratory or skin: Not available.

Mutagenicity: Not available.

Carcinogenicity: Not available.

Reproductive toxicity: Not available.

Specific target organ toxicity (single exposure): Not available.

Specific target organ toxicity (repeated exposure): Not available.

Aspiration hazard: No classifications because the product has a viscosity greater than 20,5cSt at 40°C.

Potential acute health effects
Eye contact: May cause eye irritation.
Skin contact: May cause skin irritation.
Inhalation: No known significant effects or critical hazards.
Ingestion: May cause serious problems in the airways and stomach.

Symptoms related to the physical, chemical and toxicological characteristics
Eye contact: Irritation, redness.
Skin contact: Irritation, redness.
Inhalation: Not available.
Ingestion: Nausea, puke.

Delayed and immediate effects and also chronic effects from short and long term exposure
Short term exposure:
Potential immediate effects: Not available.
Potential delayed effects: Not available.
Long term exposure:
Potential immediate effects: Not available.
Potential delayed effects: Not available.
Potential chronic health effects: Not available.

Conclusion/Summary
General: No known significant effects or critical hazards.
Carcinogenicity: No known significant effects or critical hazards.
Mutagenicity: No known significant effects or critical hazards.
Fertility effects: No known significant effects or critical hazards.
Developmental effects: No known significant effects or critical hazards.
Other information: No known significant effects or critical hazards.

12. Ecological information

Dissolve in water in any proportion and can spread to it. Contamination of water with the product may cause long-term effects on aquatic organisms. In case of soil contamination the product remain on the soil surface and decomposed in present of oxygen

12.1 Toxicity: Not available.
12.2 Persistence and degradability: Not available.
12.3 Bioaccumulative potential: Not available.
12.4 Mobility in soil: Not available.
12.5 Results of PBT and vPvB assessment: Not available.
12.6 Other adverse effects: Not available.

13. Disposal considerations

13.1 Waste treatment methods

Recovery and reuse of the product is preferred. If this is not possible, incinerate the material in suitable incineration plant in accordance with the law and the approval of local authorities. Product residues should be considered hazardous waste and must be treated according to current regulations. The same shall apply to the absorption materials accidental release of the product.

Uncleaned packaging:
The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

14. Transport information

Not classified as hazardous according to transport regulations ADR / RID, IMDG, IATA / ICAO

**Road and Rail transport ADR/RID**

UN number: 1999
UN proper shipping name: Tars, liquid including road asphalt and oils, bitumen and cut backs
ADR/RID, class: Not applicable
Packaging group: Not applicable
Environmental hazards: Yes
Special precautions for user: Not available.
Additional information: Not applicable

**Maritime transport IMDG**

UN number: 1999
UN proper shipping name: Tars, liquid including road asphalt and oils, bitumen and cut backs
IMDG class: Not applicable
Packaging group: Not applicable
Environmental hazards: Yes
Special precautions for user: Not available.
Additional information: Not applicable
15. Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Category Seveso: Not applicable

Restrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006: Not applicable

Substances in Candidate List (Art. 59 REACH): None

Substances subject to authorization (Annex XIV REACH): None

Substances subject to exportation reporting pursuant to (EC) Reg. 689/2008: None

Substances subject to the Rotterdam Convention: None

Healthcare controls: Workers exposed to this chemical agent must not undergo health checks, provided that available risk-assessment data prove that the risks related to the workers' health and safety are modest and that the 98/24/EC directive is respected.

VOC Directive 2004/42/ΕΚ: VOC=0 gr/lt

15.2 Chemical safety assessment: No chemical safety assessment has been processed for the mixture and the substances it contains.
